INSIDE THE BOX

# FRC-LCD ANTI-VANDAL

The FRC-LCD series of indoor enclosures provides protection against theft, vandalism and restrain access to buttons and devices. Protection is assured by an aluminium construction and abrasion resistant polycarbonate window. The whole series is vented and equipped with a fan to ensure proper air circulation. Easy to install, there is no need for additional hardware. The included monitor bracket is built to your monitor's specs. We have a complete line of display mounts but the enclosure can be installed flush to a wall or to any standard VESA display.

# FRC-LCD-AG ANTI-GRIP

The angled anti grip design makes for greater difficulty in grasping and removing the front protective cover. Additional security screws (top, bottom and side) have been installed for added security and a stainless steel mesh has been added internally to protect the cooling fans from being tampered with. The FRC is made of sturdy aluminum, includes a shock-proof polycarbonate window and is easy to install.

### Features

- Brand Neutral (any brand monitor)
- Internal monitor and CPU mounting brackets
- Internal power bar
- Protective polycarbonate window
- +Grip resistant cover
- +Extra security screws
- +Tamper resistant intake stainless steel mesh

### Colors

- Standard colour choices (black, grey or white)
- Optional custom colours
- Optional anti-graffiti paint
- Optional stainless steel faceplate

# FR-ENCO STAINLESS STEEL FACE PLATE

Stylish with stainless steel finish face plate. Ideal protection against vandalism and tampering. This protective enclosure is made of aluminum, it is lightweight and easy to install. It is equipped with a shock-proof polycarbonate glass and fan to ensure efficient air circulation. The monitor requires no additional hardware to mount the monitor within the enclosure and the enclosure can be mounted flush to the wall using the back panel of the FRC enclosure. However, if you want to mount with any standard VESA mount that can be done as well. Available in metallic grey, black or white (custom colors optional).

# FRI-LCD OUTDOOR INSULATED

The FRI-LCD series of outdoor enclosures provides protection against theft, vandalism and extreme weather. The unique insulated aluminium construction allows monitor operation in temperatures ranging from -40°C/-40°F to 40°C/104°F on models equipped with a heater. The abrasion resistant polycarbonate window keeps the screen safe. Vents and two thermostatic blowers keep the enclosure condensation free. Easy to install, there is no need for additional hardware. The included monitor bracket is built to your monitor's specs. We have a complete line of display mounts but the enclosure can be installed to any standard VESA display.

# FRI-HBLCD HIGH BRIGHTNESS OUTDOOR

The **FRI-HBLCD** series of outdoor enclosures have been specifically designed for high brightness monitors which generate a high amount of heat and require additional cooling and ventilation. This series provides protection against vandalism, dirt/dust, humidity and extreme temperatures. (-40C/-40F to 40C/104F). The enclosures are supplied with internal monitor mounting bracket and the enclosures can be mounted with a variety of optional mounting system. The front cover is removable for easing access to the monitor and other internal hardware. Each enclosure is custom designed and built for your specific monitor.

# FR-K15 INDOOR

The FR-K15 series of indoor kiosks are both stylish (with an emphasis on aesthetics) and secure with the protective polycarbonate window and no visible security screws. These sturdy kiosks are fabricated with an aluminum body and stainless steel rounded side panels ( optional stainless steel faceplate and custom colours). They allow for adequate air circulation with proper venting and quality grade fans to keep the monitors operating in suitable conditions. The included monitor mounting bracket is designed to fit the specific monitor being used to assure a proper fit. The kiosk can be securely mounted to the floor with the supplied floor mount plate and cut outs are supplied to install various required cables but if the kiosk is required to be moved you can add the optional free standing base plate.

# FR-K52 INDOOR

The stylish K-52 series of indoor kiosks are ideal for protecting (in public spaces) open frame or very slim monitors(32"-47") in portrait mode. Non interactive monitors and capacitive touch overlays are protected by an abrasion resistant polycarbonate window. For other interactive (touch) monitors, the window is not included; but if required, many manufacturers can supply their touch monitors with safety glass. The sturdy aluminum construction and quality internal fans assure the monitors are kept at suggested operating temperatures. The pedestal base (with supplied bracket) can house your pc/media player and all equipment can be connected to the internal power bar. As with all Batko enclosures and kiosks.....Batko can be built to fit any brand of monitor and accommodate a variety of touch technologies. The kiosk can be custom coloured and supplied with a stainless steel faceplate. The K-52 kiosk is both stylish and secure and will be a great way to showcase your information.

# FRI-K90 OUTDOOR

The FRI-K90 series of outdoor kiosks provides easy access to contents and protection against theft, vandalism and extreme weather. The unique insulated aluminium construction allows monitor operation in temperatures ranging from -40°C/-40°F to 40°C/104°F on models equipped with a heater. The abrasion resistant polycarbonate window keeps the screen safe. Vents and two thermostatic blowers keep the kiosk condensation free. The included monitor bracket is built to your monitor's specs, ensuring the perfect fit.

# FRI-PROJ OUTDOOR

The FRI-PROJ series of outdoor projector enclosures are built to withstand extreme weather, vandalism and theft. The double-wall aluminium construction is insulated and vented to ensure proper airflow. An optional heater keeps equipment safe from damage in cold temperatures. The filtered air inlet keeps bugs and dust outside, and the enclosure condensation-free. An abrasion resistant polycarbonate window enables great quality projection. Knockouts are located at the back and bottom of the cabinet for cable entry.

## CUSTOM DESIGN

---

BATKO has been manufacturing protective enclosures since 1982. We are experts in designing and building custom housings for all your needs.

Our in-house team will be pleased to gather your ideas and submit a simple and efficient solution to your demand. Our personal approach ensures that nothing is laid aside. We are brand neutral, meaning we can work with any product. Everything is made with pride in our factory with quick production lead times.

Our vast experience in protecting electronics of all kinds is a testament of quality, ranging from security cameras, flat screens and touch screens to virtually anything. Whether you need to protect your equipment from extreme weather, vandalism or simply need a streamlined way to restrain access to controls, our expertise will meet your requirements.
