FR-K10

The FR-K10

with its straight lines allows it to be very versatile by allowing the application single or double (back to back). The kiosk is available indoor or outdoor, ideal for large monitors. The kiosk was designed to provide effective physical protection against dust, surrounding handling manoeuvres and vandalism. Like the majority of **BATKO** products, this product is entirely made of aluminum and is therefore light, yet strong.

These kiosks can be used with a variety of monitors, interactive touch technologies, media players & computers and can be custom colored.
