

BATKO — FR-K50

FR-K50

The FR-K50 series of kiosks are stylishly designed to offer secure protection but easy public access to your interactive information. The monitors can range in sizes from 17-32 inches and can be mounted in portrait or landscape mode. There is room in the base compartment for mini computers or media players. The standard unit comes with a brushed stainless steel faceplate but the kiosks can be custom finished with the color and graphics of your choice.

The Batko K-50 is the ideal protective enclosure for public display applications such as museums, exhibits, theatres, tourism and way finding.
