FRC-LCD

Ideal protection against vandalism and tampering

This protective enclosure is made of aluminum, it is lightweight and easy to install. It is equipped with a shock-proof polycarbonate glass and fan to ensure efficient air circulation. The monitor requires no additional hardware to mount the monitor within the enclosure and the enclosure can be mounted flush to the wall using the back panel of the FRC enclosure. However, if you want to mount with any standard VESA mount that can be done as well. Available in metallic grey, black or white (custom colors optional).
